

DIGITALLY **ENHANCE** YOUR LIFE—NOW.

The Breast Center at LaFollette Medical Center of Campbell County is proud to announce the addition of a state-of-the-art digital mammography system, purchased with grant money from The LaFollette Medical Foundation.

One in eight women will be diagnosed with breast cancer. When detected early, the five-year survival rate is more than 90 percent. Digital mammography makes this important exam faster and more precise than ever. According to recent studies, digital mammography, as compared to traditional film mammography, detects up to 28 percent more cancers in women 50 and younger, and in women with dense breast tissue.*

To schedule your digital mammogram, talk to your physician or call 423-907-1428.

*According to the American College of Radiology.
