

WALK AGAIN. **LIVE AGAIN.** LAUGH AGAIN.

The Wound Healing Center at LaFollette Medical Center is available to treat hard-to-heal wounds.

Our caring medical team is specially trained in healing complex, chronic wounds. Conditions treated include diabetic ulcers, bone infections, compromised surgical wounds, pressure ulcers, radiation-related wounds and accidental injuries.

If you or a loved one suffers from non-healing wounds, talk to your primary care doctor or call us at 423-907-1680.
