

*Small scars.  
Big benefits.*

## THERE'S A NEW TOOL IN TOWN TO TREAT PROSTATE CANCER— THE DA VINCI S SURGICAL SYSTEM.

St. Mary's Medical Center is the only hospital in the Knoxville area with the next generation of robotic surgical systems to treat prostate cancer—all with just a few small incisions. This less invasive approach to prostate removal allows the surgeon enhanced visualization and precision, which leads to excellent outcomes in cancer control, potency and urinary function.

Minimally invasive prostate surgery offers several benefits over traditional open surgery, including:

- Shorter hospital stay
- Less blood loss
- Less scarring
- Faster recovery
- Quicker return to normal activities

For a urological consult, call **865.545.MD4U**.
