

Injury Timeout?

For years, Mercy Sports Medicine has been helping college and high school athletes get back in the game. We're also here to help "weekend warriors" of any age learn if their sports-related injury calls for an appointment with an orthopedic physician or can be treated conservatively at home.

Because sports injuries can happen at any time, our certified athletic trainers are available by telephone 24/7. For a free sports injury assessment, call **865-632-5200**. We'll advise you on what you can do to begin treating your injury at home. We can even schedule your doctor's appointment.

Whether you're a pro or a not-so-pro, you can trust us to get you off the sidelines. Call us today... tonight... this weekend... or whenever you need us.

Ask Mercy.
